EXAMINER

DU, THUAN N

ART UNIT PAPER NUMBER

2116

DATE MAILED: 07/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/852,432

Applicant(s)

COHEN ET AL.

Examiner

Thuan N. Du

Art Unit

2116

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment (dated 5/2/05).
2. Claims 1-19 are presented for examination.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 1-19 rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai (U.S. Patent No. 6,266,776) and Odaohhara et al. [Odaohhara] (U.S. Patent No. 6,574,740).
5. Regarding claim 1, Sakai teaches a method to modify power to a system, comprising:
monitoring a power level for a power supply (21) [col. 4, lines 51-52, 55-56] providing power to a plurality of devices (11-15) [Fig. 2; col. 4, lines 50-51], with each device having an operating power level;
detecting a change in said power level for said power supply [col. 4, lines 61-63];
creating a modification signal [col. 4, lines 63-64], based on said change in said power level of said power supply [col. 4, lines 61-63], to modify said operating power level of at least one of said plurality of devices [col. 7, line 62 to col. 8, line 5]; and
sending said modification signal to said at least one of said plurality of devices [col. 4, lines 52-53, 64-66; col. 5, lines 5-8; col. 7, line 66 to col. 8, line 1].

Art Unit: 2116

Sakai does not explicitly name the POWER_PME signal is modification signal.

However, the POWER_PME signal causes the system (including components 11-15) to change its operating state. Therefore, the POWER_PME is interpreted as modification signal.

Sakai does not explicitly teach that each device having more than one operating power levels. However, one of ordinary skill in the art would have recognized that each of components (11-15) in the system would obviously having at least a normal operating power level and an OFF power level and an operating power level in between if desired.

Odaohhara teaches a system comprising a plurality of components [Fig. 1] wherein each of the plurality of components (CPU, LCD) capable of switching from one operating power level to another operating power level based on power available of a power supply [Figs. 3-7; col. 8, line 14 to col. 10, line 8].

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Sakai and Odaohhara because they both teach system for controlling power consumption of a computer system. The teaching of Odaohhara would increase the performance of the system by allowing Sakai's component(s) is operable under a lower power state.

6. Regarding claim 2, Sakai teaches the method further comprising the steps of:

receiving said modification signal at said at least one of said plurality of devices [col. 4, lines 52-53, 64-66; col. 5, lines 5-8; col. 7, line 66 to col. 8, line 1]; and

modifying said operating power level for said at least one of plurality of devices in accordance with said modification signal [col. 7, line 62 to col. 8, line 5].

Art Unit: 2116

7. Regarding claim 3, Sakai teaches that the modifying comprises reducing said operating power level for said at least one of said plurality of devices in accordance with said modification signal [col. 7, line 62 to col. 8, line 5].

8. Regarding claim 4, Sakai teaches that the modifying comprises increasing said operating power level for said at least one of said plurality of devices in accordance with said modification signal [col. 8, lines 5-8].

9. Regarding claim 5, Sakai selects a number of portions of the system to operate [col. 7, lines 64-66].

10. Regarding claim 6, Sakai detects a current power level for said power supply [col. 4, lines 51-52].

11. Regarding claims 7 and 8, Sakai teaches that the system comprising a power table storing characteristics of each of the devices [col. 3, line 61 to col. 4, line 3].

12. Regarding claims 9-11, all the claimed subject matters are already discussed in respect to claims 1-8 above.

13. Regarding claims 12-17, Sakai and Odaohhara together teach the claimed method steps. Therefore, Sakai and Odaohhara together teach the apparatus to implement the claimed method steps.

14. Regarding claims 18-19, Sakai and Odaohhara together teach the claimed method steps. Therefore, Sakai and Odaohhara together teach the instruction for carrying out claimed method steps.

Conclusion

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan N. Du whose telephone number is (571) 272-3673. The examiner can normally be reached on Monday-Friday: 9:30 am - 6:00 pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne H. Browne can be reached on (571) 272-3670.

Central TC telephone number is (571) 272-2100.

The fax number for the organization is (703) 872-9306.

17. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

Art Unit: 2116

applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).

A handwritten signature in black ink, appearing to read 'Thuan N. Du', with a stylized flourish at the end.

Thuan N. Du
